

# SPREADING CRAZE PETUNIA

## *The new breed of Petunia on the block*

Craze Petunia will spread 1m, growing only 25cm tall producing a **'Living Mulch'**.

'Living Mulch' plants such as Craze Petunia will keep the soil cool and moist, help to suppress weed growth, reduce soil erosion and help to promote the **health and vigor** of the plants growing above them.

Craze Petunia is highly effective at quickly covering bare soil between shrubs and other plants, creating it's own landscape statement by reforming a bare look into a lush and healthy green garden scene. Due to its vigorous, yet contained growth, **one plant can replace up to 10 normal petunias**, making a considerable cost saving.

**Spreading Craze Petunias - The ideal 'LIVING MULCH'**
